# What will success look like?

- Nationally replicable models
- More accessible, more responsive and more effective health, care and support services
- Fewer trips to hospitals
- Care closer to home
- Better co-ordinated support
- 24/7 access to information and advice
- Access to urgent help easily and effectively, seven days a week

# Common challenges across all sites

- Leadership and organisational development – including how we learn from international partners
- Workforce – including the need for new and extended job roles
- Commissioning and contracting models – including organisational boundaries which make it hard to design care around patients
- Evaluation – are new ways of working improving the quality of care patients receive?
- Information management and technology – including how we maximise new technology

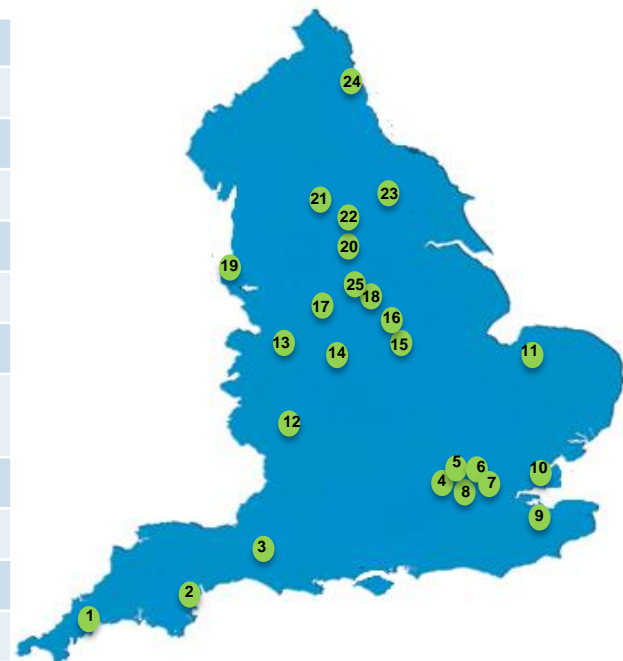

# Addressing the key enablers of transformation

# Integrated care pioneers

- The integrated care pioneers programme was launched in November 2013 and is focussed on the integration of health and social care – with arm’s length bodies signed up to support pioneer sites to develop their new integrated models of care
- The programme is supporting change and innovation at a local level, sharing learning across the pioneer network – with support from national experts
- 25 sites have been announced – some sites are also vanguards
